

Interaction Segment

~ personal chats
~ Groups
~ Community
~ Ai Agent

video, messages,
images, GitHub
files, code files

1

~ Call
~ MEETINGS (meet)

2

Outcomes :

- ~ engagements of the developers increases
- ~ meetings of the developers got more engaging (calls + v. call)
- ~ real working developers can interact any time any where

Portfolio Generator

~ During user login/onboarding, we collect the user's basic details such as Name, College / Company, Core skills

~ At the time of portfolio generation, we collect additional information, including: Past work experience and internships, Projects, Certifications and achievements, Other relevant professional data

~ Using this information, we create an AI-powered agent that: Analyzes the user's skills and experience, Structures the content professionally, Organizes the data into multiple resume templates (ATS-friendly, student-focused, modern, etc.), Automatically highlights the most relevant skills and experiences based on the selected template or target role

3

Outcomes :

This segment results in automatically generated, well-structured resumes and portfolios that are tailored to different roles and templates, ensuring professional presentation and higher relevance for recruiters.

CodeSaarthi

Smart Scheduler | team tracker

~ The primary objective of this segment is to eliminate the need for a dedicated project manager by enabling teams to manage projects collaboratively and transparently.

~ Any user can initialize a project and invite other users as project members.

~ The platform provides :

1) A personal workspace for each developer to track daily goals, tasks, and scheduled activities.

2) A shared project workspace where all members can view:
a) Task updates made by each member
b) Time spent by individuals on specific tasks
c) Overall project progress

3) This shared environment gives the project leader a centralized interface to:
a) Monitor each team member's contributions individually
b) Track time and productivity across the project
c) Identify blockers or delays
d) Mention or notify specific members in case of issues or required actions
